

I feel that the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Indiana's Telephone Privacy law has improved my family's time at home. We are not constanly being interrupted with calls we do not want. This law has been very effective, I used to receive about 50 calls per week, now we do not receive any. This law should stay intact, it is something my family feels strongly about. We do not want to receive ANY phone calls other than the ones we want, and that is not for anyone else to decide.
